Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

4	

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO/SB/08) Paper No(s)/Mail Date 5) Notice of Informal Patent Application Paper No(s)/Mail Date				

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 5/2/2007 have been fully considered but they are not persuasive.

Response to Remarks

The applicant asserts that, "It is unclear how the Examiner's assertion of "this second threshold represents an educated guess" is related to the claimed step of "deferring data transmission from said buffer." Basically, none of the result blocks (such as blocks 207, 209, and 212) after the comparison blocks (such as blocks 206, 208, 210-211, and 213-216) teaches or suggests the claimed step of "deferring data transmission from said buffer.""

The examiner respectfully disagrees. If the compression potential is greater or equal than the first threshold (hereinafter, "T"), it will switch to a raw mode. Meaning that, it is beneficial to transmit the information in a raw mode rather than in a compressed mode. However, if the compression potential is less than T, then the compression potential will be further compared to second threshold. During this stage, if the compression potential is less than or equal zero, then it will stay in compressed mode. But, if this condition fails it will be compared to the second threshold in order to determine which mode is more beneficial to transmit the information. Please note that at this point the compression potential has enter a transition region where the decision to determine which mode is best to use to transmit information has been left to the comparison of the compression potential with a second threshold. And this second

Application/Control Number: 10/757,650

Art Unit: 2611

threshold represents an "educated guess". By entering this stage in the selection scheme one can say that the deferment of transmitting the information has been accomplished.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 3. Claims (1-20) are rejected under 35 U.S.C. 103(a) as being unpatentable over Clark, II et al (hereinafter Clark) (US Patent 5,686,912) in view of Cooklev (US Patent 6,289,130 B1), and further in view of Jaquette et al (hereinafter Jaquette) (US Patent 6,271,775 B1) for the same reasons as set forth in the last Office Action.

Application/Control Number: 10/757,650

Art Unit: 2611

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Contact

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leon Flores whose telephone number is 571-270-1201. The examiner can normally be reached on Mon-Fri 7-5pm Alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Payne can be reached on 571-272-3024. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
